Project Experience Summary

Project #1

Title	: **Inventory Management System**.
Tools used	: Visual studio, MS SQLServer, IIS, Browser.
Technologies	: Asp.Net MVC, Entity Framework, C#.
Role	: Team member
Description	:

Inventory (record) management is a challenging task in every commercial business. Every business needs a system which manages the records according to business needs. For example, inventories in supermarkets, malls, warehouses need a system to record sales, stock etc, and it is tedious work to do it manually, may not be possible to fulfil customer demand.

Technical Details (Project):

A web application which covers CURD operations in Entity Framework
LINQ usage to fetch data from more than one table.
Role based Authentication in MVC design pattern.
Bootstrap for user interface.
SQL server for data persistence.

Roles and Responsibilities:

- Developed Responsive UI using Bootstrap.
- Authentication and Authorization of users are validated.
- Validated all the pages using JavaScript.

Project #2

Title	: **Training Institute Management System.**
Tools used	: Visual studio, MS SQLServer, IIS, Browser.
Technologies	: Asp.Net MVC, Entity Framework, C#.
Role	: Team member
Description	:

Training Institute Management System is basically web-based application to manage courses, students, schedule. The data from the website is stored in the SQL SERVER and the front end i.e., UI is developed using Angular. The application functionalities are unit tested using the NUnit Testing to check whether the necessary requirements are met.

Technical Details (Project):

A web application which covers CURD operations in Entity Framework
LINQ usage to fetch data from more than one table.
Role based Authentication in MVC design pattern.
Angular for user interface.
SQL server for data persistence.

Roles and Responsibilities:

- Developed Responsive UI using Angular.
- Established database connectivity to the necessary pages.

Project #3

Title	**: Instant Doctor Application**
Tools used	: Visual studio, MS SQLServer, IIS, Browser.
Technologies	: Asp.Net MVC, Entity Framework, C#.
Role	: Team member
Description	:

A smart health application which enables user to express their symptoms. It then processes user symptoms to check for various health issues that could be associated with the symptoms given by the user. If the application is unable to provide a particular solution, then it redirects the user to doctor available.

Technical Details (Project):

A web application which covers CURD operations in Entity Framework
LINQ usage to fetch data from more than one table.
Role based Authentication in MVC design pattern.
Angular for user interface.
SQL server for data persistence.

Roles and Responsibilities:

- Developed Responsive UI using Angular.
- Component testing.
- Established database connectivity to the necessary pages.

Strengths

- Good listener
- Collaborative
- Flexible
- Optimist
